

Forensic / Litigation Services

We know our industry.

When an unexpected incident occurs in your facility and results in dispute over causation, technical compliance, governmental regulations, and/or multiple party responsibility, Carmagen Engineering Inc.'s (CEI) technical experts can help get to the facts quickly.

CEI offers professional services that assist you to complete fact-finding, assess case history, and provide in-depth technical evaluation with concise insights and timely perspective, which can be essential to successful litigation efforts.

Forensic / litigation services include:

 Expert technical support	 Probability and risk assessments
 Deposition testimony and review	 Forensic determinations, such as materials, piping, mechanical and/or equipment failure, fire damage assessments, etc.
 Jury trial support	 Project execution assessments
 Public hearings	 Compliance auditing & evaluations
 Technical assessments involving process plant engineering, contracting, design, construction, operation, safety, etc.	 Intellectual property support
 Environmental consultation including regulations, hazardous materials, remediation, fugitive emissions, Basic Available Control Technology assessment, etc.	 Document reviews
 Technical performance guarantees	 Emergency operations review

For illustration, CEI has supported litigation efforts on a refining class action suit, fire / explosion damage and personnel injury cases, engineering standards and facility performance compliance, as well as structural failure at an airport terminal. We have even provided staff to incident investigative teams established by the Chemical Safety Board.

Since CEI has a wealth of engineering experts with an average of over 30 years experience in virtually all aspects of the process plant industry, we can offer fit-for-purpose consultation that meets task requirements, provides practical technical perspective and gets the job done right the first time.
